CartFusion 4.8.1
Installation Checklist

1 – SQL Database Setup

☐ Create a blank database in Microsoft SQL Server

☐ Use the provided SQL script(s) located in the "*databases*" folder to create the tables, stored procedures, and data for your CartFusion database

    a) This is usually handled with the accompanying SQL 2000 Query Analyzer, SQL 2005 Management Studio, or EMS SQL Manager

☐ Make sure to create a SQL username and password for this database.

2 – ColdFusion Settings

☐ Setup a datasource in ColdFusion that connects to this database, something like "*CartFusion*".

☐ Create a CF Mapping

    a) Logical Path: *cartfusion_core*

    b) Directory Path: *c:\<ServerRootFolder>\<YourDomainFolder>\<MappedCoreFolder>*

        -- for example: *c:\domains\cartfusion.com\core*

3 – CartFusion Application Files

☐ Put all files that are in the "*root*" folder into your test and/or live site's primary root folder.

    -- Make sure also to change the name of the *"wwwroot"* folder to whatever <u>your</u> site's web root folder is*.*

☐ In an HTML editing program like Dreamweaver, open these two (2) CartFusion "*Application.cfm*" files:

       1. "*wwwroot/Application.cfm*"

       2. *"wwwroot/admin/Application.cfm"*

  In each of these files, set variables to:

    a) SoftwareVersion = '4_8_1' ;

    b) CoreFolder = '<YourCFMappingLogicalPath>' ;

        -- for example: 'cartfusion_core'

Trade Studios Web & Graphic Design

EMAIL: support@tradestudios.com ~ WEB: www.TradeStudios.com

4 – Run the CartFusion Setup Wizard

☐ In a web browser (on your test or live site), run the CartFusion Setup Wizard page located at "*wwwroot/setup/setup.cfm*" until you see the "*Setup Complete!*" message

    a) Example for Test Site: http://localhost/cartfusion.com/setup/setup.cfm

    b) Example for Live Site: http://www.cartfusion.com/ setup/setup.cfm

5 – Preview Your Web Site and Start Adding Content

☐ In a web browser (on your test or live site), run the administration index.cfm page located at "*wwwroot/admin/index.cfm*"

    a) Example for Test Site: http://localhost/cartfusion.com/admin/index.cfm

    b) Example for Live Site: http://www.cartfusion.com/admin/index.cfm

☐ Sign in with the following administrative information: *// Change password ASAP under "Users"*

    a) Username: <the one you set in previous CartFusion Setup Wizard step>

    b) Password: <the one you set in previous CartFusion Setup Wizard step>

☐ Click on Configuration in the left navigation panel and preview your setup values for accuracy

☐ Start adding categories, sections, distributors, and products…

That's it!

To see the results, run the client site homepage located at "*wwwroot/index.cfm*"

    a) Example for Test Site: http://localhost/cartfusion.com/index.cfm

    b) Example for Live Site: http://www.cartfusion.com/index.cfm
